

A Sensor Chip The first SOC with AI & Image Sensor

Detect and track

human face

connection

Real-time edge

decision-making

without network

MS100-GR

Neural network

Face Detection

Face/Human

position, size

information

Human Detection

Real-time output

MH101

Feature

- Detect and track human face ` head head-and-shoulder
- Real-time edge
- and upper body
- decision-making without network connection
- Fallen detection
- Smart gimbal
- Interactive tov
- Smart home appliances
 - Sitting posture detection
 - Interactive tov
- connection

• Real-time edge

decision-making

without network

- Intelligent power
- switch Interactive toy
- Smart home appliances with touchless switch
- Automatic tracking online meeting camera.
- People counting
- Interactive toy

- On chip built-in gesture recognition hardware
- Handshape detection more gesture types
- object detection Real-time detect, no network latency

Accurate & reliable

Applications

Human detection & tracking

Face detection

Gesture recognition

- In-Vehicle infotainment/HUD
- Interactive toy • Chair back anti-pinch detection Interactive toy

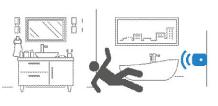

Human detection & tracking

- Fallen detection
 Able to detect
 human movement
 in covered area.
- Toy robot
 Able to detect human movement and respond accordingly.
- Smart Gimbal
 Able to track human
 movement and
 dynamically adjust the
 gimbal's angle.

Face detection

Mirror light
 Able to detect human face and turn on the mirror light.

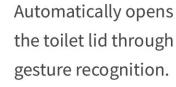

Interactive toys

Through face detection, toys will move and act as crawling toys for babies.

Gesture recognition

Screen light
 Using palm and fist to control the
 brightness and color temperature of
 the light.

Smart toilet
